Domicile:	Ireland
Base currency:	EUR
Share class currency:	EUR
ISIN:	IE00BHPGG813
UK distributor/reporting status:	Pending Approval
ISA & SIPP eligible:	Yes

Investment process

The Fund aims to replicate the performance of the Index via an OTC Total Return Swap whereby it receives the return of the index in exchange for agreed payments to the Swap Counterparty. The Fund aims to achieve returns due by investing in cash and non-cash collateral, in the ranges of approximately 10% and 90% of its Net Asset Value respectively.

Investment objective

The Tabula J.P. Morgan Global Credit Volatility Premium Index UCITS ETF (EUR) aims to achieve the returns of the J.P. Morgan Global Credit Volatility Premium Index (JCREVOLP Index), less fees and expenses.

About the index

The JCREVOLP Index provides short exposure to volatility in North American and European High Yield CDS markets by tracking the return of two credit volatility indices, rebalanced to an equal weighting monthly. To minimise market exposure, each credit volatility index sells and simultaneously delta hedges option strangles on the relevant CDS indices:

- iTraxx Crossover (XO) 5y (75 European sub-investment grade entities, equally weighted)
- CDX HY 5y (100 North American sub-investment grade entities, equally weighted)

Interest accrued on the notional cash amount makes up the remainder of the Index Value. Interest accrues at a rate equal to EONIA -0.25% (subject to change).

Performance

Fund performance is not available until a year after launch. Past performance (actual or simulated) is not a reliable indicator of future performance.

Key risks

- No capital protection: The value may go down as well as up and you may not get back the amount invested.
- Market risk: The fund is primarily exposed to credit risk. Returns will suffer if there is a default, or higher perceived risk of default, among the entities referenced by the CDS indices, or a write-down ("bail in") of an entity's debt by financial authorities. The fund may also be impacted by other factors affecting the value of debt securities issued by those entities, including changes in interest rates and exchange rates. When selling CDS on subordinate debt, such debt may be subordinate to senior debt.
- Leverage: The fund may use leverage, so losses may be magnified.
- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on the liquidity of CDS transactions.
- Counterparty risk: The fund may incur losses if an institution providing services or acting as a derivative counterparty becomes insolvent.
- Credit risk: The issuer of a financial asset held within the fund may not pay income or repay capital to the fund when due.
- OTC Total Return Swap risk: Swap returns are subject to the returns of the Index or reference assets. Valuations of a fund's Investments, the Index tracked or replicated by the fund or the FDI used by a fund to achieve tracking or replication of an Index may in certain circumstances, only be available from a limited number of market participants who may also act as counterparties to these transactions. Valuations received from such market participants may therefore be subjective and there may be substantial differences between any available valuations.

Important information

This document is issued by Cheyne Capital Management (UK) LLP ("Cheyne Capital") authorised and regulated by the Financial Conduct Authority ("FCA"), a limited liability partnership registered in England and Wales (Registered no. OC321484) Registered address: Stornoway House, 13 Cleveland Row, London, SW1A 1DH, United Kingdom. Tabula Investment Management Limited ("Tabula IM") is an Appointed Representative of Cheyne Capital. Tabula IM is a private limited company registered in England and Wales (Registered no. 11286661). Registered address: Stornoway House, 13 Cleveland Row, London, SW1A 1DH, United Kingdom. The Tabula J.P. Morgan Global Credit Volatility Premium Index UCITS ETF (EUR) (the "ICAV") is an open-ended investment sub-fund of Tabula ICAV which has variable capital having segregated liability between their funds organised under the laws of Ireland and authorised by the Central Bank of Ireland. The information contained in this document, especially as regards portfolio construction/parameter-type information, reflects the current thinking of Tabula IM and may be changed or modified in response to its perception of changing market conditions, or otherwise, without further notice to you. Accordingly, the information herein, in respect of investment products and services, should be considered indicative of Tabula IM current opinion and should not be relied on in making any investment decisions. This document is not, and under no circumstances is to be construed as an advertisement or any other step in furtherance of a public offering of shares in the United States or Canada. This document is not aimed at persons who are resident in the United States, Canada or any province or territory thereof, where the ICAV/securities are not authorised or registered for distribution and where no prospectus has been filed with any securities commission or regulatory authority. The ICAV/securities may not be acquired or owned by, or acquired with the assets of, an ERISA Plan. Investment in the products mentioned in this document may not be suitable for all investors. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product. The price of the investments may go up or down and the investor may not get back the amount invested. Your income is not fixed and may fluctuate. The value of investments involving exposure to foreign currencies can be affected by exchange rate movements. We remind you that the levels and bases of, and reliefs from, taxation can change. In respect of the products mentioned this document is intended for information purposes only and does not constitute investment advice or an offer to sell or a solicitation of an offer to buy the securities described within. In Switzerland, the ICAV may only be offered or distributed to qualified investors. The Fund's Representative in Switzerland is Oligo Swiss Fund Services SA, Av. Villamont 17, 1005 Lausanne, Switzerland. Tel: +41 21 311 17 77, email: info@oligofunds.ch. The Fund's paying agent is Banque Cantonale de Genève. Any Fund Documentation may be obtained free of charge from the Swiss Representative. In respect of the Shares distributed in or from Switzerland, the place of performance and jurisdiction is Lausanne (Switzerland). Benchmark source: the J.P. Morgan Global Credit Volatility Premium Index referenced herein is the property of J.P. Morgan and is used under licence. The J.P. Morgan Global Credit Volatility Premium Index (the "Index") has been licensed to Tabula Investment Management (the "Licensee") for the Licensee's benefit. Neither the Licensee nor the Tabula J.P. Morgan Global Credit Volatility Premium Index UCITS ETF (the "Non-JPM Product") is sponsored, operated, endorsed, recommended, sold or promoted by J.P. Morgan Securities plc ("JPMs plc") or any of its affiliates (together and individually, "JPMorgan"). JPMorgan makes no representation and gives no warranty, express or implied, to investors in or those otherwise taking exposure to the Non-JPM Product. Such persons should seek appropriate professional advice before making any investment. The Index has been designed and is compiled, calculated, maintained and sponsored by JPMs plc without regard to the Licensee, the Non-JPM Product or any investor. JPMs plc is under no obligation to continue compiling, calculating, maintaining or sponsoring the Index. JPMorgan may independently issue or sponsor other indices or products that are similar to and may compete with the Index and the Non-JPM Product. They may also transact in assets referenced in the Index (or in financial instruments such as derivatives that reference those assets). These activities could have a positive or negative effect on the value of the Index and the Non-JPM Product.

The Index Level of the J.P. Morgan Global Credit Volatility Premium Index factors in several Rebalancing Adjustment Factors which act as a drag on the performance of the Index. Considering in particular the daily rebalancing and the leverage embedded within the Index, this drag on the performance of the Index is expected to be significant. Investors should refer to the Index Rules and Q&A (available on www.jpmmorganindices.com) for more information. Investment by J.P. Morgan in the Sub-Fund or equivalent arrangements. At any time following its launch, the Tabula J.P. Morgan Global Credit Volatility Premium Index UCITS ETF (the "Sub-Fund") may receive investment, which may be substantial, from J.P. Morgan Securities plc or one of its affiliates (together "JPMorgan"). Alternatively, JPMorgan may make arrangements with third parties which incentivise those third parties to invest in the Sub-Fund. Investors should be aware that JPMorgan or such third party may (i) hedge any of its investments in whole or part, thereby reducing its exposure to the performance of the Sub-Fund and (ii) redeem its investment in the Sub-Fund at any time, without notice to the Shareholders. JPMorgan or such third party is not under any obligation to take the interests of other investors into account when making its investment decisions. Shareholders should note that any redemption of its investment by JPMorgan or such third party might have a negative effect on the value of their investment in the Sub-Fund. In particular, any large redemption from the Sub-Fund will have the indirect effect of increasing the proportion of those of the Sub-Fund's costs and expenses which are not based on the Net Asset Value of the Sub-Fund that the remaining Shareholders may have to bear. JPMorgan may also act as a market maker in securities issued by the Sub-Fund. © 2019 Tabula Investment Management Limited.
