

## Press Release

18/12/19

### **TABULA INVESTMENT MANAGEMENT EXTENDS RANGE OF ETFS LISTED ON XETRA**

Tabula Investment Management has further strengthened its offering in the German market through listing its Tabula European Performance Credit UCITS ETF (TABD), Tabula European iTraxx Crossover Credit UCITS ETF (TABH) and Tabula European iTraxx Crossover Credit Short UCITS ETF (TAB1) on Xetra. These listings join the already Xetra listed Tabula J.P. Morgan Global Credit Volatility Premium Index UCITS ETF (TABV).

Tabula's range of ETFs on Xetra offer investors exposure to European investment grade and high yield corporate credit via highly liquid credit default swap indices. The Crossover Credit ETF line is offered in both short and long positions to allow investors to take unique exposure to European high yield corporate credit.

Tabula ETFs listed on Xetra:

TABD: Diversified long exposure to primarily investment grade European credit via protection seller position: 80% iTraxx Europe 5y / 20% iTraxx Crossover 5y with minimal interest rate duration

TABH: Diversified long exposure to European high yield credit via protection seller position on iTraxx Crossover 5y with minimal interest rate duration

TAB1: Long protection position in European high yield credit on the iTraxx Crossover 5y index with minimal interest rate duration

Gereon Tewes, who leads Tabula in German-speaking European markets, commented, "I am extremely pleased to see the extension of our offering in a key and significant market. The opportunity this offers to German investors will undoubtedly spur the demand for credit exposures in fixed income and further allow us to develop our lines of business."

## Press Release

Trading on Xetra takes place daily from 9.00am to 5.30pm local time. BNP Paribas acts as market maker.

#### Tabula Investment Management Limited

Tabula is an asset manager focused on passive fixed income. It is based in London and offers Irish domiciled UCITS funds to European investors, mainly in the form of ETFs. Tabula recognises that the trend toward passive investing, which has transformed equity investing in the past two decades, has only just begun in fixed income.
