Share class currency:	EUR
ISIN:	IE00BMQ5Y557
UK distributor/reporting status:	Pending
ISA & SIPP eligible:	Yes
Registered countries:	DE, ES, FI, IE, NL, PT, SE

Investment objective

The Tabula Global IG Credit Curve Steepener UCITS ETF (EUR) - Accumulating aims to track the iTraxx-CDX IG Global Credit Steepener Index (ITXCDXST Index), less fees and expenses.

About the index

The ITXCDXST Index provides exposure to credit curve steepness in North American and European Investment Grade CDS markets. The index tracks the return of taking equal positions on CDS indices by selling 5y protection and buying 10y protection:

- 50% iTraxx Europe 5y and 10y (125 investment grade entities, equally weighted)
- 50% CDX IG 5y and 10y (125 investment grade entities, equally weighted)

The Index is rebalanced monthly to maintain an approximate 3:1 market exposure to the short On-the-Run 10 Year Index CDS position where the weight of the long On-the-Run 5 Year Index CDS position is determined to offset the credit sensitivity of the 10 Year position. Interest accrued on the notional cash amount makes up the remainder of the index value. Interest accrues at a rate equal to EONIA - 0.50% (subject to change).

Investment process

The ETF aims to directly replicate the index composition via CDS index positions and cash collateral (typically investment grade European sovereign bonds with maturity <12 months). To minimise counterparty risk, CDS trades are executed through regulated brokers and centrally cleared.

Performance

	Jun 15 - Jun 16	Jun 16 - Jun 17	Jun 17 - Jun 18	Jun 18 - Jun 19	Jun 19 - Jun 20
Share class:	n/a	n/a	n/a	n/a	n/a

Data: Tabula IM, 31 August 2020. Charts show the percentage of total CDS index notional. CDS index ratios in table reflect the notional relative to NAV. Spread steepening sensitivity represents the sensitivity to credit spread steepening and shows the expected change in NAV for a 1bp change in credit spreads. The estimated 12m yield calculation, which does not include fees and expenses, involves a number of assumptions and approximations and is not a guarantee of future returns.

Key risks

- No capital protection: The value may go down as well as up and you may not get back the amount invested.
- Market risk: The fund is primarily exposed to long and short credit risk. Returns will increase if there is a default, or higher perceived risk of default, among the entities referenced by the CDS indices, or a write-down ("bail in") of an entity's debt by financial authorities. The Sub-Fund may also be impacted by other factors affecting the value of debt securities issued by those entities, including changes in interest rates and exchange rates. When buying and selling CDS on subordinate debt, such debt may be subordinate to senior debt.
- Risk of financial derivatives and techniques: The Fund invests in financial derivative instruments to gain both long and short market exposure to the underlying market with rebalancing on a monthly basis. The performance of the Sub-Fund over periods longer than one month may not be inversely proportional or symmetrical with the returns of the reverse positions in the underlying instruments.
- Foreign exchange risk: The Fund invests in EUR and USD denominated assets and does not provide a hedge to currency exposure in the base class. Strengthening or weakening of currencies may impact performance.
- Leverage: The fund may use leverage, so losses may be magnified.
- Liquidity risk: If there are insufficient buyers or sellers of CDS indices, the fund may not be able to match index exposure exactly and the fund may not be able to buy or sell investments readily. Neither the index provider nor the Issuer make any representation or forecast on the Liquidity of CDS transactions.
- Counterparty risk: The fund may incur losses if an institution providing services or acting as a derivative counterparty becomes insolvent.
- Credit risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Important information

This document is issued by Tabula Investment Management Limited ("Tabula"), authorised and regulated by the Financial Conduct Authority ("FCA"). Tabula is a private limited company registered in England and Wales (Registered no. 11286661). Registered address: 10 Norwich Street, London EC4A 3BD. Business address: 55 Strand, London WC2N 5LR. The Tabula Global IG Credit Curve Steepener UCITS ETF (EUR) - Accumulating (the "Fund") is an open-ended investment sub-fund of Tabula ICAV which has variable capital having segregated liability between their funds organised under the laws of Ireland and authorised by the Central Bank of Ireland. This material is for distribution to Professional Clients (as defined by the FCA or MIFID Rules) and Qualified Investors only and should not be relied upon by any other persons. Tabula has not considered the suitability of this investment against your individual needs and risk tolerance. The data displayed provides summary information, any decision to invest must be based solely on the information contained in the Fund's Prospectus, Key Investor Information Document and the latest half-yearly report and unaudited accounts and/or annual report and audited accounts, when available, free from your broker, financial adviser or Tabula. It is the responsibility of every person reading this document to satisfy himself as to the full observance of the laws of any relevant country, including obtaining any government or other consent which may be required or observing any other formality which needs to be observed in that country and which might be relevant to the subscription, purchase, holding, exchange, redemption or disposal of any investments.
