Investment objective

The Tabula North American CDX High Yield Credit Short UCITS ETF (USD) - Accumulating aims to track the CDX North American High Yield Credit Short Index (CDXNAHYS Index), less fees and expenses.

About the index

The CDXNAHYS Index provides short exposure to high yield North American corporate credit. To emphasise credit risk and reduce direct interest rate risk, it takes exposure via a liquid credit default swap (CDS) index rather than corporate bonds:

- CDX North American High Yield 5y (100 sub-investment grade entities, equal weight)

The index reflects the return from buying protection on the current series of CDX North American High Yield 5y. It has market exposure of 100%, rebalanced monthly. Exposure is calculated as the ratio of CDS bond equivalent price to index value, so the ratio of notional to Net Asset Value may not be exactly 100%.

Investment process

The Fund aims to directly replicate the index composition via CDS index positions and cash collateral (the fund may hold more than 35% of its assets in US treasuries for cash management purposes). To minimise counterparty risk, CDS index trades are executed through regulated brokers and centrally cleared.

Performance

	Mar 16 - Mar 17	Mar 17 - Mar 18	Mar 18 - Mar 19	Mar 19 - Mar 20	Mar 20 - Mar 21
Share class:	n/a	n/a	n/a	n/a	n/a
Index:	-9.9%	-3.6%	-3.4%	12.4%	-12.9%

	YTD	1m	1y	3y (ann.)	5y (ann.)	Since fund inc.	Since share class inc.	Volatility	Sharpe Ratio
Share class:	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a
Index:	-1.2%	-1.5%	-12.9%	-1.8%	-3.8%	-9.1%	-9.1%	8.1%	-0.62

Data: Tabula IM/IHS Markit, 31 March 2021. Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. Volatility and Sharpe ratio are calculated over 5 years.

The figures shown relate to past performance. Past performance is not a reliable indicator of future results.

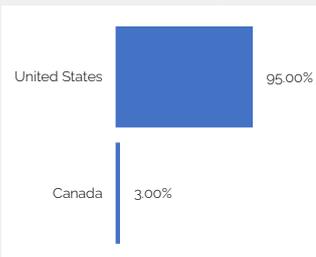

Fund Composition

Key metrics

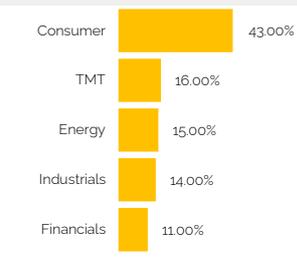

CDX HY ratio:	110%
Credit DV01:	-5.4bps
Weighted CDS spread:	338bps
Modified IR duration (yrs):	-0.10
Estimated 12m yield (gross):	-5.11%

Credit exposure - country

Credit exposure - sector

Credit exposure - rating

Data: Tabula IM, 31 March 2021. Charts show the percentage of total CDS index notional. CDS index ratios in table reflect the notional relative to NAV. Credit DV01 is the expected change in NAV for a 1bp change in credit spreads. The estimated 12m yield calculation, which does not include fees and expenses, involves a number of assumptions and approximations and is not a guarantee of future returns.

Key risks

- **No capital protection:** The value may go down as well as up and you may not get back the amount invested.
- **Market risk:** The fund is primarily exposed to credit risk. Returns will suffer if there is a default, or higher perceived risk of default, among the entities referenced by the CDS indices, or a write-down ("bail in") of an entity's debt by financial authorities. The fund may also be impacted by other factors affecting the value of debt securities issued by those entities, including changes in interest rates and exchange rates. When selling CDS on subordinate debt, such debt may be subordinate to senior debt.
- **Short exposure risk:** The Fund uses a short market exposure to the underlying market with rebalancing on a monthly basis. The performance of the Fund over periods longer than one month may not be inversely proportional or symmetrical with the returns of long positions in the underlying instruments. The assumed return on cash in the index also contributes to asymmetry in returns versus a long position. The Fund is intended for investors who wish to take a short-term view on the Index and whose investments are not intended as buy and hold.
- **Leverage:** The fund may use leverage, so losses may be magnified.
- **Liquidity risk:** If there are insufficient buyers or sellers of CDS indices, the fund may not be able to match index exposure exactly and the fund may not be able to buy or sell investments readily. Neither the index provider nor the Issuer make any representation or forecast on the Liquidity of CDS transactions.
- **Counterparty risk:** The fund may incur losses if an institution providing services or acting as a derivative counterparty becomes insolvent.
- **Credit risk:** The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Important information

This document is issued by Tabula Investment Management Limited ("Tabula"), authorised and regulated by the Financial Conduct Authority ("FCA"). Tabula is a private limited company registered in England and Wales (Registered no. 11286661). Registered address: 10 Norwich Street, London EC4A 1BD. Business address: 55 Strand, London WC2N 5LR.
