Investment objective

The Tabula iTraxx IG Bond UCITS ETF (EUR) - Accumulating aims to track the iBoxx iTraxx Europe Bond Index (the Index), less fees and expenses.

About the index

The Index aims to provide corporate bond exposure that closely reflects iTraxx Europe, a liquid and widely-used credit benchmark comprising 125 European investment grade entities. The Index selects up to three bonds for each entity in the current series of iTraxx Europe. It includes EUR-denominated bonds with minimum outstanding of EUR 500 million and 3-7 years to maturity (extended to 1-10y if an entity has no bonds in the 3-7y range).

The entities of the Index are reviewed and rebalanced in March and September in line with the iTraxx Europe. Bonds are weighted such that each entity has equal notional weighting and the Index has an average maturity of 5 years. Due to the bond selection criteria, the Index may not include all entities in iTraxx Europe. On a monthly basis the index may be rebalanced to accommodate to any criteria violations of the bonds.

Investment process

The Fund invests in a portfolio of corporate bonds that, as far as practicable, reflects the composition of the Index.

Key risks

- No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.
- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.
- Counterparty risk: The Sub-Fund may incur losses if an institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.
- Credit risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.
