UK distributor/reporting status:	Yes
ISA & SIPP eligible:	Yes
Registered countries:	AT, CH, DE, DK, ES, FI, FR, IT, IE, LU, NL, NO, PT, SE, UK
ESG exclusions:	Yes

Investment objective

The Tabula EUR IG Bond Paris-aligned Climate UCITS ETF (EUR) - SEK Hedged Acc. aims to track the Solactive ISS Paris Aligned Select Euro Corporate Bond Index (SOLESPAB Index), less fees and expenses. This share class also aims to hedge exposure to SEK.

About the index

The index provides exposure to EUR-denominated IG bonds that meet the requirements for an EU Paris-Aligned Benchmark and is aligned with a 1.5C Paris scenario. Data provided by ISS ESG is used to exclude issuers in violation of social norms (including the UN GC), and those involved with controversial weapons or tobacco, causing significant environmental harm or with revenues from oil, gas, coal and energy intensive electricity above certain thresholds.

The index also applies a liquidity screen, targeting c.1000 bonds. The selected bonds are weighted so as to meet:

- Minimum 50% initial reduction in greenhouse gas emissions versus the Solactive Euro IG Index
- Minimum 7% annual reduction in greenhouse gas emissions
- Sector, maturity and rating exposures within strict limits versus the Solactive Euro IG Index

Investment process

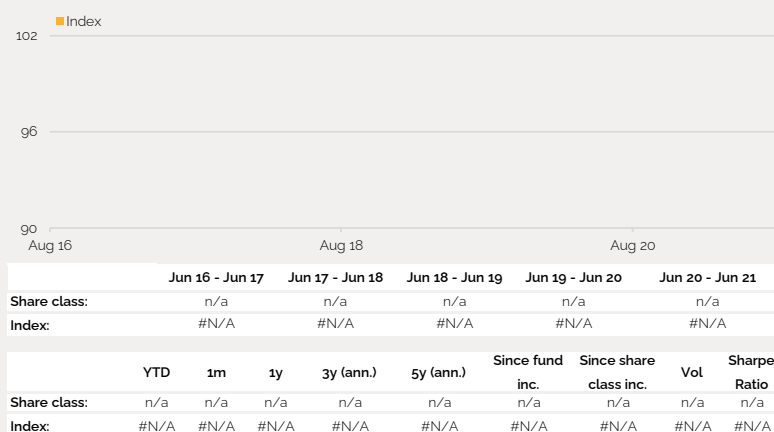

The ETF invests in a portfolio of corporate bonds that reflects the composition of the index as far as practicable and meets the EU criteria for Paris-aligned Benchmarks.

Climate metrics

	Weighted average GHG emissions	GHG emissions reduction vs parent index	YoY GHG emissions reduction	GHG emissions per \$1m invested	12-months GHG emissions reduction vs parent'
Share class:	17.6 M T CO ₂	61.0%		350.0 T CO ₂	4,679 T CO ₂
Index:	16.6 M T CO ₂	63.5%	7.8%	414.5 T CO ₂	
Parent index:	45.5 M T CO ₂			521.7 T CO ₂	

Data: Solactive/ISS ESG. GHG emissions represent gross scope 1, 2 and 3 greenhouse gas emissions. Parent index is the Solactive EUR IG Corporate Index. YoY reduction is as of the most recent semi-annual reduction in January and July. 12-months GHG emission reduction vs parent represents the projected annual cumulative difference in GHG emissions generated by the fund since inception and the equivalent AuM being invested in the parent index, calculated monthly using month-end AuM.

Performance

Data: Tabula IM/Solactive. 31 August 2021. Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. Volatility and Sharpe ratio are calculated over 5-years.

The figures shown relate to past performance. Past performance is not a reliable indicator of future results.

Key risks

- No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.
- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.
- Counterparty risk: The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.
- ESG screening: The environmental, social and governance screening criteria are embedded with the index selection process, which seeks to exclude bonds issued by companies involved in certain activities. The investment manager is not responsible for monitoring the screening process or confirming that all bonds which pass the screening process are issued by companies with adequate environmental, social or governance standards.
- Credit risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.

Important information

This document is issued by Tabula Investment Management Limited ("Tabula"), authorised and regulated by the Financial Conduct Authority ("FCA"). Tabula is a private limited company registered in England and Wales (Registered no. 11286661). Registered address: 10 Norwich Street, London EC4A 1BD. Business address: 55 Strand, London WC2N 5LR. The Tabula US Enhanced Inflation UCITS ETF (USD) – CHF – Hedged Accumulating (the "Fund") is an open-ended investment sub-fund of Tabula ICAV which has variable capital having segregated liability between their funds organised under the laws of Ireland and authorised by the Central Bank of Ireland.
