INTRODUCTION

This document (the "GUIDELINE") is to be used as a guideline with regard to the composition, calculation and maintenance of the Solactive ISS Paris Aligned Select Euro Corporate IG Index (the "INDEX"). Any amendments to the rules made to the GUIDELINE are approved by the OVERSIGHT COMMITTEE specified in Section 5.5. The INDEX is owned, calculated, administered and published by Solactive AG ("SOLACTIVE") assuming the role as administrator (the "INDEX ADMINISTRATOR") under the Regulation (EU) 2016/1011 (the "BENCHMARK REGULATION" or "BMR"). The name "Solactive" is trademarked.

The text uses defined terms which are formatted with "SMALL CAPS". Such Terms shall have the meaning assigned to them as specified in Section 6 (Definitions).

The Guideline and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. SOLACTIVE does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. SOLACTIVE strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for SOLACTIVE – irrespective of possible obligations to ISSUERS – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by SOLACTIVE does not constitute a recommendation for capital investment and does not contain any assurance or opinion of SOLACTIVE regarding a possible investment in a financial instrument based on this INDEX.

1. INDEX SPECIFICATIONS

1.1. SCOPE OF THE INDEX

- The INDEX is a rules-based index, engineered to measure the performance of liquid, euro denominated, investment grade corporate debt. The index provides exposure to a portfolio, which is based on ISS ESG climate analysis and is in line with a 1.5°C scenario through 2050. At the same time the index displays very similar credit and interest rate risk distributions compared to the Solactive Euro IG Corporate Index.
- To achieve the 1.5°C scenario, the weighted GHG EMISSIONS of the INDEX is reduced compared to the Benchmark Index.
- On a semi-annual basis, for the selection days in January and July, the GHG EMISSIONS of the index is reduced to be in line with a yearly decarbonization rate of at least 7%.
- The Index Currency is EUR.

1.2. IDENTIFIERS AND PUBLICATION

The INDEX is published under the following identifiers:

Name	ISIN	Currency	Туре	RIC	BBG ticker
Solactive ISS Paris Aligned					
Select Euro Corporate IG	DE000SL0AY79	EUR	TR	.SOLESPAB	SOLESPAB
Index					

TR means that the INDEX is calculated as a total return index as described in the Bond Index Methodology, which is available on the SOLACTIVE website: https://www.solactive.com/documents/bond-index-methodology/.

The INDEX is published on the website of the INDEX ADMINISTRATOR (www.solactive.com) and is, in addition, available via the price marketing services of Börse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the INDEX via its information systems.

Any publication in relation to the INDEX (e.g. notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: https://www.solactive.com/news/announcements/.

1.3. INITIAL LEVEL OF THE INDEX

The initial level of the INDEX on the LIVE DATE is 1000. Historical values from the LIVE DATE will be recorded in accordance with Article 8 of the BMR.

1.4. PRICES AND CALCULATION FREQUENCY

The INDEX is calculated and distributed once every Business Day based on the Last Evaluated Bid Price of the INDEX COMPONENTS. Bonds added in a rebalancing (see Section 3) are included the INDEX at the Last Evaluated Ask Price on the relevant Rebalance Day (as specified in Section 3.3). Bonds which are excluded from the INDEX in a rebalance are reflected in the calculation of the level of the INDEX for the Rebalance Day at the Last Evaluated Bid Price on the relevant Rebalance Day. INDEX analytical values are calculated each Business Day using the Last Evaluated Bid Price based on Fixing Time. Prices of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the WM 4 PM London Fixing quoted by Reuters.

1.5. LICENSING

Licenses to use the INDEX as the underlying value for financial instruments, investment funds and financial contracts may be issued to stock exchanges, banks, financial services providers and investment houses by Solactive AG.

2. INDEX SELECTION

On each Selection Day, all bonds which meet the INDEX COMPONENT REQUIREMENTS are eligible for inclusion in the INDEX and will be added as INDEX COMPONENT on the REBALANCE DAY. Additionally, on each Selection Day, it will be evaluated whether all current INDEX COMPONENTS still meet the INDEX COMPONENT REQUIREMENTS. Each INDEX COMPONENT that does not meet the INDEX COMPONENT REQUIREMENTS will be removed from the INDEX on the next REBALANCE DAY.

2.1. SELECTION OF THE INDEX COMPONENTS

The initial composition of each INDEX, as well as any selection for a rebalance (as specified in Section 3) is determined using the following rules:

- A price from the PRICING PROVIDER must be available for each INDEX COMPONENTS on each SELECTION DAY
- All Index Components must be a member of the Benchmark Index.

All bonds and their issuers are evaluated based on the criteria outlined in the table below. Bonds which do not comply with the screens or do not disclose relevant information are excluded from the INDEX The evaluation is based on data provided by the ESG DATA PROVIDER:

Theme	Topic	Exclusion criterion	
	Environment	Verified failure to respect established norms such as the United Nations Global Compact (UNGC) principles, the Organisation for Economic Co-operation	
Norm-Based Research	Human Rights		
	Corruption	and Development (OECD) Guidelines for Multinational Enterprises, or UN Guiding Principles for Business and Human Rights.	
	Labour Rights		
Controversial	Chemical weapons	Verified or alleged ongoing involvement	
Weapons Research	Biological weapons		

	Nuclear weapons		
	Depleted Uranium	_	
	Nuclear weapons outside the NPT	_	
	Cluster munitions	_	
	Anti-personnel mines		
	Coal mining and power generation	>=1%	
	Fossil fuel production, exploration, distribution, and services.	>=10%	
	Electric power generation from fossil fuel sources	>=50%	
	Adult Entertainment - Maximum Percentage of Revenue	>15%	
	Adult Entertainment Producer - Maximum Percentage of Revenue	>5%	
	Alcohol - Maximum Percentage of Revenue	>15%	
Activity-Based	Alcohol Producer - Maximum Percentage of Revenue	>5%	
Screening	Gambling - Maximum Percentage of Revenue	>15%	
	Gambling Ownership or Operations	>5%	
	Cannabis Recreational	>0%	
	Civilian Firearms - Maximum Percentage of Revenue	>5%	
	Civilian Firearms Producer	>0%	
	Weapons Producer - Maximum Percentage of Revenue	>5%	
	Weapons - Maximum Percentage of Revenue	>15%	
	Genetic Engineering - Maximum Percentage of Revenue	>5%	
	Any tie to thermal coal	>0%	
	Tobacco Cultivation & Production	>0%	
Environmental	Sustainable Development Goal 12: Responsible Consumption and Production	Significant Negative Impact, i.e. single SDG	
Objectives	Sustainable Development Goal 13: Climate Action	Impact Rating of < -5.0.	
	Sustainable Development Goal 14: Life Below Water	All companies are	

scored on each SDG on scale from -10 to +10.

Sustainable Development Goal 15: Life on Land

Explanation: % figures refer to revenue threshold (for degree of involvement)

From all bonds which fulfill the above mentioned criteria, only the most liquid bonds are selected. To keep the index' key characteristics similar to the ones of the INVESTABLE UNIVERSE, a stratified sampling approach is used. The stratified sampling approach utilizes the following 3 steps:

- 1. Each security in the INVESTABLE UNIVERSE will be assigned to a specific bucket according to the securities' rating, sector and modified duration. There are 10 rating buckets, 2 sector buckets (Financials, Non-financials) and 5 modified duration buckets.
- 2. Market weights of each bucket, relative to INVESTABLE UNIVERSE, are calculated. According to the weight of each bucket the number of bonds which represent the specific bucket is determined. This is done by applying the following formula:

$Number\ of\ Bonds\ per\ Bucket_i = Bucket\ Weight_{SOLEUIGC}*\ Target\ Number\ of\ Bonds$

Please note that $Number\ of\ Bonds\ per\ Bucket_j$ has to be an integer number. This is ensured by cutting off all decimals. This will lead to a lower number of bonds in the index than initially set by the target. To compensate for this, the buckets with the largest difference between the exact number of bonds and the integer number of bonds will receive one extra security. Despite this effort to keep the number of constituents in the INDEX fixed, due to the strict exclusion criteria mentioned above there is no guarantee to fulfill this objective.

3. Once the target number of bonds per bucket is defined. The appropriate number of bonds are selected which display the largest amount outstanding of the respective bucket. To avoid unnecessary turnover bonds which are already a member of the last selection will be deemed to have an amount outstanding of double their actual amount outstanding.

The determination of the INDEX COMPONENTS is fully rules-based and the INDEX ADMINISTRATOR has no discretion.

2.2. WEIGHTING OF THE INDEX COMPONENTS

On each Selection Day each Index Component is weighted using an optimization algorithm. This algorithm determines the optimal weights of each Index Component. The objective function of the optimization is the minimization of the average GHG Emissions of the Index, subject to the following constraints:

- The aggregated weight of all INDEX COMPONENT must be equal to 100%
- The weighted average GHG EMISSIONS of the INDEX must be equal to the TARGET GHG EMISSION.
- Rating Bucket the weight of each rating bucket (AAA, Aa1, Aa2, etc.) in the INDEX may only deviate by +-2% from the weight of the same bucket in the INVESTABLE UNIVERSE.
- Maturity Bucket the weight of each maturity bucket (1-5 Years, 5-10 Years, 10-15 Years, 15-20 Years, 25+ Years) in the INDEX is only allowed to deviate by +- 3% from the weight of the same bucket in the INVESTABLE UNIVERSE.
- Sector Bucket the weight of each sector bucket in the INDEX is only allowed to deviate by +-5% from the weight of the same bucket in the INVESTABLE UNIVERSE. The financials sector bucket may only deviate by +-1.5% from the respective bucket weight in the INVESTABLE UNIVERSE.
- Issuer Bucket the weight of each issuer in the INDEX is only allowed to deviate by +-4% from the weight of the same issuer in the INVESTABLE UNIVERSE, unless the issuer is excluded from the INDEX. Additionally an absolute Issuer weight cap of 5% is included in the index
- INDEX COMPONENTS the weight of each INDEX COMPONENT is only allowed to deviate by +0.5% and -0.05% from the weight of the INDEX COMPONENT in the INVESTABLE UNIVERSE, unless the component is excluded from the Index.
- Turnover turnover is defined as two way turnover. The turnover of the INDEX is limited to exceed the monthly turnover of the BENCHMARK INDEX by 5%. Turnover is calculated using all information as of Selection Day.
- In case the optimization is unable to find a feasible result the constraints are loosened in the following order:
 - o Rating deviation is widened to 3%
 - o Issuer deviation is widened to 5%
 - o Sector deviation is widened to 7.5%
 - Turnover constraint is widened to 7.5%
 - o Turnover constraint is widened to 10%

On the initiation of the index on the Base Date the weighted average GHG Emissions of the Index was reduced by 50% compared to weighted average GHG Emissions of the Investable Universe. Starting in August 2020 the Target GHG Emissions of the Index is the minimum between a 50% GHG Emissions reduction of the Investable Universe and the Sele-Decarbonization Trajectory of the Index.

3. REBALANCE

3.1. ORDINARY REBALANCE

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1) the INDEX is adjusted on the REBALANCE DAY after CLOSE OF BUSINESS.

For more information on the rebalance procedure please refer to the Bond Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: https://www.solactive.com/documents/bond-index-methodology/.

SOLACTIVE will publish any changes made to the INDEX COMPONENTS with sufficient notice before the REBALANCE DAY on the SOLACTIVE webpage under the section "Announcement", which is available at https://www.solactive.com/news/announcements/

3.2. FXTRAORDINARY RFBALANCE

[In addition to the ordinary rebalance, the INDEX is also rebalanced extraordinarily. These adjustments take place outside the rebalancing schedule and follow different rules than the ordinary rebalances. The extraordinary rebalance is triggered by the mechanism described below:

The INDEX is not rebalanced extraordinarily.

4. CALCULATION OF THE INDEX

4.1. INDEX FORMULA

The INDEX is calculated as a gross total return index.

The calculation is performed according to the Bond Index Methodology, which is available on the Solactive website: https://www.solactive.com/documents/bond-index-methodology/.

A gross total return index seeks to replicate the overall return from holding an index portfolio, thus considering both coupon payments and Corporate Action proceeds in addition to the price changes adjusted for any accrued interest. Coupon and other cash payments will be reinvested on a monthly basis.

The periodic reinvestment formula implies a periodic reinvestment in the INDEX of proceeds resulting from corporate actions and coupon payments in respect of the INDEX COMPONENTS on the next regular REBALANCE DAY following such events. For the period until reinvestment the proceeds are held in a cash component. On the REBALANCE DAY the proceeds are reinvested in the INDEX proportionately to the weights of the INDEX COMPONENTS. The periodic reinvestment formula tracks the performance of the INDEX COMPONENTS relative to their market value on the immediately preceding REBALANCE DAY. The market value for an individual INDEX COMPONENT on a REBALANCE DAY is based on the price for the respective bond and its face value on the SELECTION DAY associated with the REBALANCE DAY.

A more detailed description of the mechanics of the periodic reinvestment formula can be found in the Bond index Methodology under Section 1.2.2, which is available on the Solactive website: https://www.solactive.com/documents/bond-index-methodology/.

4.2. ACCURACY

The level of the INDEX will be rounded to 2 decimal places.

4.3. ADJUSTMENTS

Under certain circumstances, an adjustment of the INDEX may be necessary between two regular REBALANCE DAYS. Basically, such adjustment is need to be made if a corporate action (as specified in Section 4.4 below) in relation to an INDEX COMPONENT occurs. Such adjustment may need to be done in relation to an INDEX COMPONENT and/or may also affect the number of INDEX COMPONENTS and/or the weighting of certain INDEX COMPONENTS and will be made in compliance with the Bond Index Methodology, which is available which is available on the SOLACTIVE website: https://www.solactive.com/documents/bond-index-methodology/.

4.4. CORPORATE ACTIONS

As part of the INDEX maintenance Solactive will consider various events — also referred to as corporate actions — which result in an adjustment to the INDEX between two regular REBALANCE DAYS. Such events have a material impact on the price, weighting or overall integrity of INDEX COMPONENTS. Therefore, they need to be accounted for in the calculation of the INDEX. Corporate actions will be implemented from the cum-day to the ex-day of the corporate action, so that the adjustment to the INDEX coincides with the occurrence of the price effect of the respective corporate action.

Adjustments to the INDEX to account for corporate actions will be made in compliance with the Bond Index Methodology, which is available which is available on the SOLACTIVE website: https://www.solactive.com/documents/bond-index-methodology/. This document contains for each corporate action a brief definition and specifies the relevant adjustment to the INDEX variables.

While Solactive aims at creating and maintaining its methodology for treatment of corporate actions as generic and transparent as possible and in line with regulatory requirements, it retains the right in accordance with the Bond Index Methodology to deviate from these standard procedures in case of any unusual or complex corporate action or if such a deviation is made to preserve the comparability and representativeness of the INDEX over time.

Solactive considers following, but not conclusive, list of corporate actions as relevant for INDEX maintenance:

- Early Redemption (an event that leads to a redemption of a bond before the regular maturity date)
- > Flat Trading (e.g. a bond ISSUER fails to meet its coupon payment obligation)
- > Bond Default (e.g. when the ISSUER fails to meet its coupon payment obligation or repay the principal at maturity)
- > Tender Offers (a holder of a bond is invited to tender the bond for a specific price at a specific time before the regular maturity date)
- > Exchange Offers (type of a tender offer where the ISSUER offers its bondholders to exchange their existing bonds for an asset other than cash)
- Distressed Debt Exchange (form of debt exchange when bondholders agree to reduce the principal amount of debt securities in order to obtain higher payment priority in the form of secured debt)
- > Bond Funge (bond issue that is attached to an existing one (parent bond). On a defined date the parent bond absorbs the funged bond)
- > Payment-in-Kind Bonds (a situation where a bond pay interest in additional bonds rather than in cash)
- Conversion of CoCo Bonds

- > Debt Issuance
- > Bond Maturity

4.5. RECALCULATION

Solactive makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. Solactive endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of "a reasonable period of time" as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the Solactive website: https://www.solactive.com/documents/correction-policy/.

4.6. MARKET DISRUPTION

Market stress can arise due to a variety of reasons, but generally results in inaccurate or delayed prices for one or more INDEX COMPONENTS. The determination of the INDEX may be limited or impaired at times of illiquid or fragmented markets and market stress.

5. MISCELLANEOUS

5.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the INDEX (for example the determination of the INDEX COMPONENTS or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement established by the INDEX ADMINISTRATOR.

5.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Methodology Policy, which is incorporated by reference available on the SOLACTIVE website: https://www.solactive.com/documents/methodology-policy/.

Such change in the methodology will be announced on the SOLACTIVE webpage under the Section "Announcement", which is_available at https://www.solactive.com/news/announcements/. The date of the last amendment of this INDEX is contained in this GUIDELINE.

5.3. CHANGES IN CALCULATION METHOD

The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal, financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

5.4. TERMINATION

Solactive makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, Solactive follows a clearly defined and transparent procedure to adapt index methodologies to changing underlying markets (see Section 5.2 "Methodology Review") in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which the INDEX is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the INDEX, the INDEX rules, and particularly the selection criteria, can no longer be applied coherently or the INDEX is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

Solactive has established and maintains clear guidelines on how to identify situations in which the cessation of the INDEX is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the Solactive website: https://www.solactive.com/documents/termination-policy/.

5.5. OVERSIGHT

An oversight committee composed of staff from SOLACTIVE and its subsidiaries (the "OVERSIGHT COMMITTEE") is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the OVERSIGHT COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: https://www.solactive.com/documents/methodology-policy/.

6. DEFINITIONS

"BASE DATE" is 31/01/2022.

"BENCHMARK INDEX" is the Solactive Euro IG Corporate Index (SOLEUIGC)

"BENCHMARK REGULATION" shall have the meaning as defined in Section "Introduction".

"BMR" shall have the meaning as defined in Section "Introduction".

"BUSINESS DAY" with respect to the INDEX each day Monday to Friday except common European banking holidays. Common European banking holidays are Good Friday, Easter Monday, Christmas Day, Boxing Day and New Year's Day.

"CLOSE OF BUSINESS" is a time stamp when an INDEX is calculated.

"EFFECTIVE TIME TO MATURITY" is the minimum of the next call or put date and the final maturity date.

"ESG DATA PROVIDER" IS ISS ESG

"FIXED COUPON BONDS" are bonds with a coupon rate that is fixed throughout their life, as opposed to bonds with floating, or variable coupons.

"FIXING TIME" is the time when the prices for the INDEX COMPONENTS are fixed for index calculation. [This is specified in the Bond Index Methodology, which is available on the SOLACTIVE website: https://www.solactive.com/documents/bond-index-methodology/.]

"FLOATING RATE NOTES" are bonds with a floating coupon rate, i.e. the coupon payments fluctuate in line with the underlying level of a pre-specified interest rate.

"GUIDELINE" shall have the meaning as defined in Section "Introduction".

"GHG Emissions" are the sum of Scope 1,2 and 3 Greenhouse Gas Emissions as received from the ESG DATA PROVIDER. For all computations gross or absolute Greenhouse Gas Emissions are used. GHG Emissions are reported by issuers or estimated by the ESG DATA PROVIDER in accordance with global or European standards, such as the Product Environmental Footprint (PEF), the Organisation Environmental Footprint (OEF) EN 16 EN methods11, the Corporate Value Chain (Scope 3) Accounting and Reporting Standard12, the EN ISO 14064 or the EN ISO 14069.

"INDEX" shall have the meaning as defined in Section "Introduction".

"INDEX ADMINISTRATOR" shall have the meaning as defined in Section "Introduction".

"INDEX CALCULATOR" is Solactive or any other appropriately appointed successor in this function.

"INDEX COMPONENT" is each bond reflected in the INDEX.

"INDEX COMPONENT REQUIREMENTS" shall have the meaning as defined in Section 2.1.

"INDEX CURRENCY" is the currency specified in the column "Currency" in the table in Section 1.2.

"INVESTABLE UNIVERSE" is the composition of the Solactive Euro IG Corporate Index.

"ISSUER" is the issuing entity of the respective bond.

"LAST EVALUATED ASK PRICE" the last available evaluated ask price by the designated PRICING PROVIDER.

"LAST EVALUATED BID PRICE" the last available evaluated bid price by the designated PRICING PROVIDER.

"LAST EVALUATED MID PRICE" is the average between LAST EVALUATED ASK PRICE and LAST EVALUATED BID PRICE.

"LIVE DATE" is 2020-11-18.

"OVERSIGHT COMMITTEE" shall have the meaning as defined in Section 5.5.

The holder of the puttable bond has the right, but not the obligation, to demand early repayment of the principal. The put option is exercisable on one or more specified dates.

"PRICING PROVIDER" is the ICE

"PRIVATE PLACEMENT" A private placement involves the sale of securities to a relatively small number of select investors. Investors targeted include wealthy accredited investors, large banks, mutual funds, insurance companies and pension funds.

"REBALANCE DAY" is the last Business Day of the month.

"SELECTION DAY" is 3 BUSINESS DAYS before the scheduled REBALANCE DAY, disregarding any potential change of the REBALANCE DAY.

"Self-Decarbonization Trajectory": The Index will follow a self-decarbonization trajectory of at least 7% annually. Weighted GHG Emissions are reduced in the January and July rebalancings.

"SOLACTIVE" shall have the meaning as defined in Section "Introduction".

"SPOT" is the spot foreign exchange rate to convert the currency of the INDEX COMPONENT into the denomination of the INDEX CURRENCY.

"TARGET NUMBER OF BONDS" is 1000.

"TARGET GHG EMISSIONS" is the weighted average GHG EMISSIONS level the INDEX has to achieve in order to comply with the Paris Aligned Benchmark Index requirements.

7. HISTORY OF INDEX CHANGES

Version	Date	Description
1.0	18 November 2020	Index Guideline creation (<i>initial version</i>)
1.01	24 August 2021	Clarification of exclusion criteria
1.1	13 January 2022	Update of BASE DATE due to Scope 3 GHG emission measurement methodology change of the ESG DATA PROVIDER; for more background see the announcement at
		https://www.solactive.com/methodology-change-all-solactive- owned-administered-eu-climate-transition-benchmarks-and-eu- paris-aligned-benchmarks-based-on-institutional-shareholder- services-iss-data-effective-date-05-01-2/.
1.2	20 January 2023	New ESG related selection criteria have been added to section 2.1.
