

Statement on principal adverse impacts of investment decisions on sustainability factors

Financial product: Tabula EUR HY Bond Paris-Aligned Climate UCITS ETF

Summary: Tabula EUR HY Bond Paris-Aligned Climate UCITS ETF, a Sub-Fund of Tabula ICAV, considers principal adverse impacts of its investment decisions on sustainability factors. This statement on principal adverse impacts on sustainability factors covers the reference period from 1 January 2022 to 31 December 2022. Data is sourced from MSCI ESG Research unless otherwise stated. The assets under management used to calculate the metrics are shown in Appendix 1.

The Sub-Fund is designd to track the performance of the Markit iBoxx MSCI ESG EUR High Yield Paris-Aligned Capped Index. This is a reference benchmark meeting the criteria for an EU Paris-aligned Benchmark (PAB) described in regulation (EU) 2020/1818.

Description of the principal adverse impacts on sustainability factors

Indicators applicable to investments in investee companies

Adverse sustainability indicator		Metric	Impact (2022)	Impact (2021)	Coverage	Explanation	Actions taken, and actions planned and targets set for the next reference period
CLIMATE AND OTH	HER ENVIRONMENT-RELA	ATED INDICATORS					
Greenhouse gas emissions	GHG emissions 2. Carbon footprint	Scope 1 GHG emissions Scope 2 GHG emissions Scope 3 GHG emissions Total GHG emissions Carbon footprint	3.434.87 1.174.64 25.639.50 30.327.70	N/A N/A N/A N/A	90.15% 90.15% 88.47% 88.47%	The sum of portfolio companies' GHG emissions (tCO2e) weighted by the portfolio's value of investment in a company and by the company's most recently available enterprise value including cash. Scope 3 emissions are estimated by MSCI ESG Research. Note that these metrics do not cover all investments of the fund, as enterprise values are not available for all fixed income issuers The total annual Scope 1, Scope 2, and estimated Scope 3 GHG emissions associated with 1 million EUR invested in the	The Sub-Fund commits to reducing weighted average GHG emissions by at least 7% per annum, and by 50% relative to its investment universe. However, these reductions may not be reflected in the emissions-related PAIs published in this report. This is because the PAB rules allow fixed income benchmarks to use aggregate emissions, rather than emissions relative to enterprise value or revenues (as measured in the PAIs. The Investment Manager undertakes collaborative engagement on carbon emissions as a member of the Institutional Investors Group on Climate Changes and a signatory to Climate Action 100+. Information on the progress of this engagement is available at https://www.climateaction100.org/progress/progress-update/ . The Investment Manager is allocated to the engagement team for a specific issuer and is an active partcipant in this engagement. However, the allocated issuer may not be an investee company of the Sub-Fund.
						portfolio. Companies' carbon emissions are apportioned across all outstanding	

3. GHG intensity of investee companies	GHG intensity of investee companies	772.85	N/A	100.00%	shares and bonds (based on the most recently available enterprise value including cash). The portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue).	
4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%	N/A	100.00%	The percentage of the portfolio's market value exposed to issuers with fossil fuels related activities, including extraction, processing, storage and transportation of petroleum products, natural gas, and thermal and metallurgical coal.	The Sub-Fund excludes issuers with revenues from oil, gas, coal and energy intensive electricity above the thresholds specified in the PAB rules. It also excludes issuers with any ties to thermal coal. These exclusions are built into the methodology of the reference benchmark and applied using data provided by MSCI ESG Research.
 Share of non- renewable energy consumption and production 	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources	78.59%	N/A	83.71%	The portfolio's weighted average of issuers' energy consumption and/or production from non-renewable sources as a percentage of total energy used and/or generated.	The Investment Manager began monitoring this metric for FY2022 and will evaluate ways to reduce negative impacts, in discussion with the provider of the Sub-Fund's reference benchmark.
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector A (Agriculture, Forestry& Fishing) B (Mining & Quarrying) C (Manufacturing) D (Electricity, Gas, Steam and Air Conditioning	N/A N/A 1.23 0.10	N/A N/A N/A	87.36% 87.36% 87.36% 87.36%	The portfolio's weighted average of Energy Consumption Intensity (GwH/million EUR revenue)	The Investment Manager began monitoring these metrics for FY2022 and will evaluate ways to reduce negative impacts, in discussion with the provider of the Sub-Fund's reference benchmark.

OECD Guidelines for Multinational Enterprises. This exclusion is built into the methodology of the reference benchmark and applied using data provided by MSCI ESG Research.
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	34.57%	N/A	98.58%	The percentage of the portfolio's market value exposed to issuers that are not signatories in the UN Global Compact.	The Investment Manager began monitoring this metric for FY2022 and will evaluate ways to reduce negative impacts, in discussion with the provider of the Sub-Fund's reference benchmark and MSCI ESG Research.
	12. Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	13.64%	N/A	14.58%	The portfolio holdings' weighted average of the difference between the average gross hourly earnings of male and female employees, as a percentage of male gross earnings.	The Investment Manager is awaiting better data coverage before evaluating how to reduce this negative impact.
	13. Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	33.42%	N/A	100.00%	The portfolio holdings' weighted average of the ratio of female to male board members.	The Investment Manager began monitoring this metric for FY2022 and will evaluate ways to reduce negative impacts, in discussion with the provider of the Sub-Fund's reference benchmark and MSCI ESG Research.
	14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%	N/A	100.00%	The percentage of the portfolio's market value exposed to issuers with an industry tie to landmines, cluster munitions, chemical weapons or biological weapons. Note: Industry ties includes ownership, manufacturing and investments. Ties to landmines do not include related safety products.	In line with the PAB rules, the Sub-Fund excludes issuers, including chemical and biological weapons, landmines and cluster munitions. This exclusion is built into the methodology of the reference benchmark and applied using data provided by MSCI ESG Research

Additional climate and other environment-related indicators	4. Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	37.68%	N/A	94.23%	The percentage of the portfolio's market value exposed to issuers without a carbon emissions reduction target aligned with the Paris Agreement.	The Investment Manager began monitoring this metric for FY2022 and will evaluate ways to reduce negative impacts, in discussion with the provider of the Sub-Fund's reference benchmark.
Additional indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters	14. Number of identified cases of severe human rights issues and incidents	Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis	0.00	N/A	90.15%	The total number of severe and very severe human rights concerns controversies associated with EUR 1 million invested in the portfolio. It is calculated as the weighted average of Number of Severe and Very Severe Human Rights Concerns Controversies per company divided by the company's most recently available enterprise value including cash (EVIC).	Human rights is the first principle of the UN Global Compact. In line with the PAB rules, the Sub-Fund excludes issuers deemed in violation of the UNGC principles. This exclusion is built into the methodology of the reference benchmark and applied using data provided by MSCI ESG Research.

Appendix 1

Metrics are calculated using the quarter-end Assets Under Management of the Sub-Fund as follows:

Date	AUM
31 Mar 2022	EUR 59.6M
30 Jun 2022	EUR 64.1M
30 Sep 2022	EUR 51.9M
31 Dec 2022	EUR 60.6M
