This document was published on 16 November 2023

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type This is a UCITS fund

Objectives

Investment Objective: The Sub-Fund is actively managed and will seek to outperform "ICE BofA Asian Dollar Investment Grade Index" (the "Benchmark Index") over the medium to long term on a total return basis. The Sub-Fund intends to achieve its investment objective by:

- i) investing at least 70% of assets in investment grade debt securities denominated in US Dollar and issued by Asian Pacific issuers;
- ii) investing up to 30% of assets in sub-investment grade or unrated debt securities with a suitable risk-reward profile (as assessed by the Investment Manager).

The Sub-Fund may invest in fixed rate debt securities, floating rate debt securities, corporate debt securities, government debt securities and debt securities issued by government-related entities or multinational institutions; debt securities denominated in U.S. Dollar, Euro, Japanese Yen, Singapore Dollar, Australian Dollar, offshore Renminbi or Hong Kong Dollar; and sale and repurchase agreements.

As further described in the "Investment Techniques and Instruments" section in the Prospectus, the Sub-Fund may also invest in financial derivative instruments (FDIs) including interest rate futures and bond futures for interest rate hedging and efficient portfolio management purposes, as well as foreign exchange forwards for currency hedging purposes. The Sub-Fund's maximum net derivative exposure may be up to 50% of its Net Asset Value. The ICE BofA Asian Dollar Investment Grade Index (the "Benchmark Index") measures the performance of investment grade U.S. Dollar denominated sovereign, quasi-government, corporate, securitized and collateralized debt publicly issued in the U.S. domestic and eurobond markets by Asian issuers. The Sub-Fund is actively managed and the Benchmark Index shall serve as a reference point to assess the performance of the Sub-Fund only. The Investment Manager has discretion to use an alternative index as the Benchmark Index if the Investment Manager deems it appropriate to do so, subject to advance notice to the Shareholders. Exclusions, detailed in the supplement, are applied to the composition of the Sub-Fund's portfolio based on the MSCI ESG Controversies and Global Norms methodology.

Redemption and Dealing Shares: Shareholders may subscribe/redeem units at the appropriate NAV per share provided an order request is received by the ICAV by the trade cut-off time 4.30pm (London time). Orders will be dealt the following working day. Subscriptions/redemptions must meet the minimum amounts as set out in the supplement of the Sub-Fund.

Distribution Policy: The Sub-Fund can launch both accumulating and distributing share classes. Please refer to www.tabulaim.com/documents and search "dividend calendar" for further information.

Intended Retail Investor: The Sub-Fund is intended for sophisticated investors aiming to invest over the long term, who are able to make an informed investment decision based on this document and the Prospectus, have a risk appetite consistent with the risk indicator below and understand that there is no capital guarantee protection (100% of capital is at risk).

What are the risks and what could I get in return?

Lower risk

Higher risk

Typically Lower Rewards

Typically Higher Rewards

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back. Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Sub-Fund has been rated as a 2 due to the nature of its investments and frequency of price movements which includes the following. This rates the potential losses from future performance at a medium level and poor market conditions could impact the capacity of the Sub-Fund to pay you.

Key risks:

No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.

Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.

Counterparty risk: The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent

Credit risk: The issuer of a financial asset held within the Sub-Fund may not pay income or repay capital to the Sub-Fund when due.

ESG screening: The environmental, social and governance screening criteria are embedded with the index selection process, which seeks to exclude bonds issued by companies involved in certain activities. The investment manager is not responsible for monitoring the screening process or confirming that all bonds which pass the screening process are issued by companies with adequate environmental, social or governance standards.

Capital Protection: this product does not include any protection from future market performance so you could lose some or all of your investment

High yield securities risk: The prices of high yield bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities possibly leading to high yield issuers not being able to service their principal and interest payment obligations. The secondary market for securities that are high yield may be less liquid than the markets for higher quality securities.

Performance Scenarios

The figures shown include all the costs of the product itself (the ongoing costs of the representative share class) but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 5 years.

Performance Scenarios

Recommended hold period: 5 years

Investment: 10000 \$

Scenarios		If you exit after 1 year	If you exit after 3 years	If you exit after the 5-year recommended holding period
Stress Scenario	What you might get back after costs	8441.35 \$	8626.15 \$	8253.59 \$
	Average Return each year	-15.587%	-4.807%	-3.766%
Unfavourable Scenario	What you might get back after costs	8441.35 \$	8933.44 \$	9218.61 \$
	Average Return each year	-15.587%	-3.690%	-1.614%
Moderate Scenario	What you might get back after costs	10259.70 \$	11032.75 \$	11812.27 \$
	Average Return each year	2.597%	3.330%	3.387%
Favourable Scenario	What you might get back after costs	11239.60 \$	11940.40 \$	12712.33 \$
	Average Return each year	12.396%	6.090%	4.917%

The SRI and performance scenarios computation have been integrated using data of the fund benchmark and, for data points prior to the benchmark launch, the parent index as a proxy.

What happens if Tabula Investment Management Limited is unable to pay out?

The assets of the Fund are segregated from those of Tabula Investment Management Limited. In addition, HSBC Continental Europe, Dublin Branch, as the depository of Tabula ICAV funds (the "Depository"), is responsible for the safekeeping of the assets of the Fund. To that effect, if Tabula Investment Management Limited defaults, there will be no direct financial impact on the Fund. In addition, the Fund's assets shall be segregated from the Depository's assets, which limits the risk for the Fund suffering some loss in case of default of the Depository. As a unitholder in the Fund, there is no compensation or guarantee scheme in place.

What are the costs?

The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

Investment: 10000 \$	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of the 5 years
Total costs	70.00 \$	216.33 \$	357.63 \$
Annual cost impact (*)	0.700%	0.726%	0.726%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your median return per year before cost (the ongoing cost of the representative share class) is projected to be 4.11% and your median return per year after costs is projected to be 3.39%.

Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories. Note that there is no performance fee.

Impact on return per year			
One-off costs	Entry costs	0.00%	The costs you pay when entering your investment
	Exit costs	0.00%	
Other ongoing costs	Portfolio transaction		The cost of buying and selling the underlying investment for the product
	Other ongoing costs	0.70%	The costs that we take each year for managing your investment
Incidental costs	Performance fees		

Transaction Cost: This is an estimate of the costs incurred when we buy and sell the underlying investments of the product. The actual amount will vary depending on how much we buy and sell

Other Ongoing Costs: this is the total expense ratio

..

How long should I hold it and can I take money out early?

The funds are designed to be held over the long term and we recommend you hold this investment for at least 5 years.

You can request to take some or all your money out at any time, you can typically require to buy or sell shares in the sub fund on any business day (set out in the fund supplement)

If you sell your shares at an earlier stage this will increase the risk of lower investment returns or losses.

How can I complain?

If you wish to make a complaint about the Fund, the Issuer or any person advising or selling the fund, you should write to: Tabula Investment management, 55 Strand, London WC2N5LR. Alternatively, you can email IR@tabulagroup.com or via our website <https://www.tabulaim.com/contact/>
