Investment objective

The Tabula Global High Yield Fallen Angels Paris-aligned Climate UCITS ETF - Accumulating (the Fund) aims to track the Bloomberg MSCI Global Corporate Fallen Angels Paris-Aligned Index (I37640 Index), less fees and expenses.

Index information

Index:	Bloomberg MSCI Global Corporate Fallen Angels Paris-Aligned Index
Index provider:	Bloomberg
Bloomberg index ticker:	I37640 Index

About the index

The I37640 Index ("the Index") aims to provide liquid and diversified exposure to Paris-aligned HY bonds which have been downgraded from investment grade, with a focus on both climate and broader ESG. It also employs a time-based tilt to overweight issuers in the first year of being downgraded and to underweight issuers two years after being downgraded. To meet the criteria for an EU Paris-aligned benchmark, it targets 50% lower GHG emissions than the global high yield fallen angel market (as represented by the Bloomberg MSCI Global Corporate Fallen Angels Paris-Aligned Index, "the Parent Index") and reduces its GHG emissions by 7% per annum. It also excludes issuers in violation of social norms (e.g. the UN Global Compact), involved with controversial weapons, fossil fuels (revenue thresholds) or tobacco or causing significant environmental harm. To enhance ESG characteristics, the index applies additional MSCI ESG screens (controversies, governance or environmental controversies) and is optimised to have higher green revenue than the Parent Index. The Index applies a strict liquidity filter and aims to keep sector exposures close to its parent index.

Key risks

- **No capital protection:** The value of your investment may go down as well as up and you may not get back the amount you invested.
- **Liquidity risk:** Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.
- **Counterparty risk:** The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.
- **ESG screening:** The environmental, social and governance screening criteria are embedded with the index selection process, which seeks to exclude bonds issued by companies involved in certain activities. The investment manager is not responsible for monitoring the screening process or confirming that all bonds which pass the screening process are issued by companies with adequate environmental, social or governance standards.

Key risks (continued)

- **Credit risk:** The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.
- **High yield securities risk:** The prices of high yield bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities possibly leading to high yield issuers not being able to service their principal and interest payment obligations. The secondary market for securities that are high yield may be less liquid than the markets for higher quality securities.
