Capital is at risk. The value of your investment may go down as well as up and you may not get back the amount you invested. Investors should read the key risks section of this document, Key Investor Information Document and Prospectus prior to investing.

Investment objective

The Tabula Haitong Asia ex-Japan High Yield Corp USD Bond ESG UCITS ETF (USD) - GBP-Hedged Accumulating (the Fund) aims to track the iBoxx MSCI ESG USD Asia ex-Japan High Yield Capped Index (IBXXUXJT Index), less fees and expenses. This share class also aims to hedge foreign currency exposure into sterling.

About the index

The Index provides exposure to USD-denominated Asia ex-Japan HY bonds that meet the EU SFDR Article 8 benchmark requirements. The Index applies ESG filters to Asia ex-Japan HY bonds with remaining time to maturity of at least 1 year and an issuer notional of at least US\$400m.

The Index uses data provided by MSCI ESG Research to exclude issuers in violation of social norms (including the UN Global Compact), involved with controversial weapons or tobacco, causing significant environmental harm or with revenues from oil, gas, coal and energy intensive electricity above certain thresholds. In addition, an ESG tilt and momentum factor is applied.

The Index has a 3% issuer cap and 50% sector cap, where excess weights are redistributed proportionately to the remaining bonds. Sector exposures are managed within 5% of the parent index. The +/- 5% sector weights are applied to the Index after the liquidity filters but before the ESG screens, tilt and momentum factors.

A detailed methodology is available in the documents section of tabulaim.com

Investment process

The ETF invests in a portfolio of corporate bonds that reflects the composition of the Index as far as practicable, less fees and expenses.

Performance

	Dec 18 - Dec 19	Dec 19 - Dec 20	Dec 20 - Dec 21	Dec 21 - Dec 22	Dec 22 - Dec 23
Fund (after fees):	n/a	n/a	n/a	-18.8%	-10.1%
IBXXUXJT Index:	n/a	13.5%	-16.1%	-17.9%	-9.3%

	YTD	1m	1y	3y (ann.)	5y (ann.)	Since share class inception	Vol	Sharpe ratio
Share class (after fees):	0.6%	2.8%	-9.9%	n/a	n/a	-9.1%	n/a	n/a
IBXXUXJT Index:	0.7%	3.0%	-8.5%	-14.2%	n/a	-9.7%	13.3%	-0.85

Data: Tabula IM/S&P Global, 31 December 2023. Volatility and Sharpe ratio are calculated over five years and includes Parent Index data if historic Fund Index data is not available. Fund represents the base currency Share Class. Performance is shown where more than 12-months track record is available net of fees and on a total returns basis.

The figures shown relate to past performance. Past performance is not a reliable indicator of future results.

Key risks

- **No capital protection:** The value of your investment may go down as well as up and you may not get back the amount you invested.
- **Liquidity risk:** Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.
- **Counterparty risk:** The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.
- **ESG screening:** The environmental, social and governance screening criteria are embedded with the index selection process, which seeks to exclude bonds issued by companies involved in certain activities. The investment manager is not responsible for monitoring the screening process or confirming that all bonds which pass the screening process are issued by companies with adequate environmental, social or governance standards.
- **Credit risk:** The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.

Key risks (continued)

- **High yield securities risk:** The prices of high yield bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities possibly leading to high yield issuers not being able to service their principal and interest payment obligations. The secondary market for securities that are high yield may be less liquid than the markets for higher quality securities.
- **Emerging markets risk:** issuers from emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include a greater 'liquidity risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- **Currency risk:** Currency hedging may not completely eliminate currency risk in the Sub-Fund and may affect its performance

Important information

This document is issued by Tabula Investment Management Limited ("Tabula"), on behalf of Tabula ICAV, an umbrella Irish collective asset-management vehicle incorporated in Ireland, authorised and regulated by the Financial Conduct Authority ("FCA"). Tabula is a private limited company registered in England and Wales (Registered no. 11286661). Registered address: 10 Norwich Street, London EC4A 1BD.
