General Information

Principal activities

Tabula ICAV ("the ICAV") is an umbrella Irish collective asset-management vehicle incorporated in Ireland on 25 October 2017, pursuant to the Irish Collective Asset-management Vehicles Act 2015, as amended (the "ICAV Act") and approved by the Central Bank of Ireland (the "Central Bank"). It was incorporated under the registration number of C174472.

The ICAV is authorised by the Central Bank as an ICAV pursuant to part 2 of the ICAV Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, (the "Central Bank UCITS Regulations"). The ICAV was authorised as a UCITS on 3 August 2018.

The investment objective and policies for each Sub-Fund and the investment restrictions in relation thereto will be formulated by the directors at the time of creation of such Sub-Fund. Each Sub-Fund aims to achieve its investment objective, through investment in transferable securities and liquid financial assets in accordance with the UCITS Regulations.

The transferable securities and liquid financial assets in which each Sub-Fund may invest generally must be listed or traded on a regulated market except that up to 10% of the Net Asset Value of a Sub-Fund may be invested in transferable securities and liquid financial assets which are not so listed or traded.

The ICAV is organised in the form of an umbrella fund with segregated liability between Sub-Funds. The Instrument of Incorporation provides that the ICAV may offer separate classes of shares, each representing interests in Sub-Funds, with each Sub-Fund comprising a separate and distinct portfolio of investments. The ICAV may establish Mutual Sub-Funds and UCITS ETF Sub-Funds. A separate pool of assets shall not be maintained for each class within a Sub-Fund. Further shares must be effected in accordance with the requirements of the Central Bank.

The assets of each Sub-Fund will be invested in accordance with the investment objective and policies applicable to such Sub-Fund.

As at 31 December 2024, the ICAV has obtained the approval of the Central Bank for the establishment of twenty Sub-Funds, the Tabula Global IG Credit Curve Steepener UCITS ETF, Tabula CDX IG Bond UCITS ETF, Tabula US Enhanced Inflation UCITS ETF, Tabula EUR IG Bond Paris-aligned Climate UCITS ETF, Tabula Haitong Asia ex-Japan High Yield Corp USD Bond ESG UCITS ETF, Tabula Liquid Credit Income UCITS Fund, Tabula USD HY Bond Paris-Aligned Climate UCITS ETF, Tabula EUR HY Bond Paris-Aligned Climate UCITS ETF, Tabula Euro Enhanced Inflation UCITS ETF, Tabula Balanced Credit UCITS Fund, Tabula GCC Sovereign USD Bonds UCITS ETF, Tabula GBP IG Bond Paris-aligned Climate UCITS ETF, Tabula FTSE Indian Government Bond Short Duration UCITS ETF, Tabula Global High Yield Fallen Angels Paris-aligned Climate UCITS ETF, Tabula Global High Yield Credit UCITS Fund, Tabula EUR Ultrashort IG Bond Paris-Aligned Climate UCITS ETF, Tabula Haitong Asia Pacific Select Bond Fund, Tabula USD Ultrashort IG Bond Paris-Aligned Climate UCITS ETF, Janus Henderson Tabula Japan High Conviction Equity UCITS ETF and Janus Henderson Tabula Pan European High Conviction Equity UCITS ETF (Collectively the "Sub-Funds").

Additional Sub-Funds may be established by the ICAV with the prior approval of the Central Bank

The investment objective of Tabula Global IG Credit Curve Steepener UCITS ETF is to track the performance of the iTraxx-CDX IG Global Credit Steepener Index (the Index) to within an acceptable tracking error. The Sub-Fund seeks to achieve its investment objective primarily through Index CDS trading activity in order to track, as closely as possible, the performance of the Index.

The investment objective of Tabula US Enhanced Inflation UCITS ETF is to track the performance of the Bloomberg US Enhanced Inflation Index (the Index) to within an acceptable tracking error. In order to achieve its investment objective, the Sub-Fund intends to invest its net assets in OTC Total Return Swaps whereby the Sub-Fund receives the return of certain Underlying Indices in exchange for payment to the Swap Counterparty of an agreed rate of return pursuant to an agreement in accordance with the requirements of the International Swaps and Derivatives Association together with a portfolio of US TIPS.

The investment objective of Tabula EUR IG Bond Paris-aligned Climate UCITS ETF is to track the performance of the Solactive ISS Paris Aligned Select Euro Corporate IG Index (the Index) to within an acceptable tracking error thereby aligning investments to the Paris Climate Agreement and assisting the movement towards a low carbon economy. The Sub-Fund will seek to achieve its investment objective primarily through investment in a portfolio of investment grade fixed rate corporate bonds that, as far as practicable, reflects the composition of the Index. While it is intended that the Sub-Fund's investments will comprise investment grade issues, issues may be downgraded in certain circumstances from time to time. In such event the Sub-Fund may hold non-investment grade issues until such time as the non-investment grade issues cease to form part of the Sub-Fund's Index (where applicable) and it is possible and practicable (in the Investment Manager's view) to liquidate the position.

The investment objective of Tabula Haitong Asia ex-Japan High Yield Corp USD Bond ESG UCITS ETF is to track the performance of the Markit iBoxx MSCI ESG USD Asia ex-Japan High Yield Capped TCA Index (the "Index") within an acceptable tracking error (which will take into account, amongst other things, the fees and expenses incurred) while seeking to provide investors with a total return, taking into account both capital and income returns, which reflects the return of the Index. In order to achieve its investment objective, the Sub-Fund will invest in a portfolio of fixed income securities that, as far as possible and practicable, consist of the constituent securities of the Index. The types of fixed income securities in which the Sub-Fund may invest are US dollar-denominated, sub-investment grade, fixed-rate corporate securities issued by companies in Asia (excluding Japan) and traded in the U.S. and Europe.

The Investment objective of Tabula Liquid Credit Income UCITS Fund is to maximise total rates of return, meaning capital appreciation plus income of its investments, over the medium term primarily from returns of credit derivatives, with prudent levels of risk while maintaining generally moderate levels of volatility. The Sub-Fund will seek to achieve its investment objective primarily through long or short exposure to the credit risk of corporates via credit derivatives.

The investment objective of Tabula EUR HY Bond Paris-Aligned Climate UCITS ETF was to track the performance of the iBoxx MSCI EUR High Yield Paris Aligned Capped TCA Index (the Index) within an acceptable tracking error (which took into account, amongst other things, the fees and expenses incurred) thereby aligning investments with the EU Paris-Aligned Benchmark framework and helping investors move towards a low carbon economy, while at the same time seeking to provide investors with a total return which reflected the return of the Index.

The investment objective of Tabula GCC Sovereign USD Bonds UCITS ETF is to track the performance of the ICE Gulf Cooperation Council Government Bond ex-144a Index (the Index) to within an acceptable tracking error. The Sub-Fund will seek to achieve its investment objective primarily through investment in a portfolio of USD-denominated sovereign fixed rate bonds and Sukuks issued by members of the GCC that, as far as practicable, reflects the composition of the Index. The issuers are rated either investment grade or sub-investment grade. The Sub-Fund may hold sovereign issues that may cease to form part of the Index (where applicable) and it is possible and practicable (in the Investment Manager's view) to liquidate the position.

The investment objective of Tabula Global High Yield Fallen Angels Paris-aligned Climate UCITS ETF is to track the performance of the Bloomberg MSCI Global Corporate Fallen Angels Paris-Aligned Index (the Index) within an acceptable tracking error (which will take into account, amongst other things, the fees and expenses incurred) thereby aligning investments with the EU Paris-Aligned Benchmark framework, assisting the movement towards a low carbon economy and contributing to broader environmental objectives, while at the same time seeking to provide investors with a total return which reflects the return of the Index. The Sub-Fund will seek to achieve its investment objective primarily through investment in a portfolio of corporate bonds from issuers in developed markets that, as far as practicable, reflects the composition of the Index. The issuers have been downgraded to sub-investment grade, although the Sub-Fund may hold investment grade bonds. The Sub-Fund primarily invests in fixed rate corporate bonds and may also invest in floating rate bonds.

General Information (continued)

Principal activities (continued)

The investment objective of Tabula Global High Yield Credit UCITS Fund was to maximise total rates of return, meaning capital appreciation plus income of its investments, over the medium term. The Sub-Fund was actively managed and sought to generate returns that, over time, exceeded that of the ICE BofA Global High Yield Constrained Index USD Hedged (the "Benchmark"). The Sub-Fund sought to achieve its investment objective by employing a "top-down" approach, investing in a combination of standardised, liquid instruments linked to government debt, interest rate markets and diversified portfolios of corporate debt and the Benchmark tracked the performance of a diversified portfolio of bonds issued by corporates in developed markets currencies with credit ratings below BBB-/Baa3.

The investment objective of Tabula EUR Ultrashort IG Bond Paris-Aligned Climate UCITS ETF is to track the performance of the Solactive ISS Paris Aligned Select 0-1 Year Euro Corporate IG Index (the "Index") within an acceptable tracking error (which will take into account, amongst other things, the fees and expenses incurred) thereby aligning investments with the EU Paris-Aligned Benchmark framework, assisting the movement towards a low carbon economy. The Sub-Fund will seek to achieve its investment objective primarily through investment in a portfolio of EUR denominated, investment grade, Ultrashort corporate bonds that, as far as practicable, reflects the composition of the Index. The Sub-Fund may invest both in fixed rate and floating rate bonds.

The investment objective of Tabula FTSE Indian Government Bond Short Duration UCITS ETF is to track the performance of the FTSE Indian Government Bond FAR Short Duration Capped Index (the "Index") to within an acceptable Tracking Error. The Sub-Fund will seek to achieve its investment objective primarily through investment in a portfolio of INR-denominated fixed rate central government securities (G-Sec) eligible for investment to non-residents under Fully Accessible Route ("FAR"). The issuers are rated either investment grade or sub-investment grade.

The investment objective of Tabula Haitong Asia Pacific Select Bond Fund is to maximise total rates of return, meaning capital appreciation plus income of its investments, over the medium term. The Sub-Fund is actively managed in order to capture opportunities in debt securities issued in the Asian Pacific fixed income market, by mainly investing in securities that are part of the ICE BofA Asian Dollar Investment Grade Index (the "Benchmark Index"). As part of the investment process, the Investment Manager has broad discretion over the composition of the Sub-Fund's portfolio and can take exposure to companies, countries or sectors not included in the Benchmark Index or take different positioning in terms of duration, geographical allocation and/or sector or issuer selection compared to the Benchmark Index, even though the Benchmark Index constituents are generally representative of the Sub-Fund's portfolio.

The investment objective of Janus Henderson Tabula Japan High Conviction Equity UCITS ETF is to provide capital growth over the long term by investing in a concentrated, actively managed portfolio of equity securities issued by Japanese companies. Under normal circumstances, the Sub-Fund will invest at least 90% of its assets in equity securities or depositary receipts issued by Japanese companies. The Sub-Fund may invest in companies of any size in any industry. The Sub-Fund will typically have 20-30 holdings and is not expected to have fewer than 20 holdings.

The investment objective of Janus Henderson Tabula Pan European High Conviction Equity UCITS ETF is to provide capital growth over the long term by investing in a concentrated, actively managed portfolio of equity securities issued by European companies. Under normal circumstances, the Sub-Fund will invest at least 90% of its assets in equity securities or depositary receipts issued by European companies. The Sub-Fund may invest in companies of any size in any industry, though will typically invest in large and mid sized companies. The Sub-Fund will typically have 20-30 holdings and is not expected to have fewer than 20 holdings.

Investment Manager's Report

The below table provides information relating to the tracking difference and error of each Sub-Fund vs its respective index. In addition, the Investment Manager has provided some high level commentary to accompany the data presented.

The non-hedged share classes tracked their indices effectively during the period and had tracking difference within the expected levels. This divergence in the FX hedged share class during the period is predominantly from interest rate differentials, future value & hedge ratio drift and unrealized hedging P&L.

- Note that the above table displays the base and any hedged share classes.
- The expected annualised tracking error is up to 150bps.

(a) Realised Tracking Error - the difference between the Sub-Fund's performance (total return) and the index's performance (total return).

(b) Total Expense Ratio ("TER") or the Expected Tracking Error which is the total annual fees and operating expenses of the Sub-Fund (except for transaction charges and taxes or duty charges for portfolio re-balancing, all of which are paid separately out of the assets of the Sub-Fund) per Share class as a percentage per annum of the Net Asset Value of the Share Class.

Non-ETF Sub-Funds

TLIQ (launch date: 16 December 2021)

H2 2024 saw a small tightening of credit spreads overall with the iTraxx Main index tighter by 3.3bp and the CDX IG tighter by 3.6bp over the period; in which risky assets broadly rallied as Global Equities were up 5.6% over the period, Global High-Yield corporate bonds returned 5.7% and Global Investment Grade corporate bonds returned 2.4% (EUR, hedged). The TabCap Liquid Credit Income UCITS Fund outperformed these assets as the fund returned 6.3% (class A, net, EUR) as the fund benefited from the embedded carry (+2.7%) and the positive slide coming from a steep September roll (2%) of the CDS index it invests in. Main macro events in the period under review included the sell-off triggered over the summer by the unwind of the JPY carry trade, central banks starting to cut rates, with the Fed sounding more hawkish acknowledging rate cuts pause at the end of the year, and politics with Trump's election, which as far as credit was concerned in 2024, had little impact. Geopolitics' developments were also scrutinized by markets participants. TLIQ's AUM grew by c.100mm EUR to c.378mm EUR by the end of the year.

TABULA ICAV

Notes to the Financial Statements

for the period from 1 July 2024 to 31 December 2024

1. General

Tabula ICAV ("the ICAV") is an umbrella Irish collective asset-management vehicle incorporated in Ireland on 25 October 2017, pursuant to part 2 of the Irish Collective Asset-management Vehicles Act 2015, as amended (the "ICAV Act"), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). It was incorporated under the registration number of C174472. The ICAV was authorised as a UCITS on 3 August 2018.

As at 31 December 2024, the ICAV has obtained the approval of the Central Bank for the establishment of twenty Sub-Funds, the Tabula Global IG Credit Curve Steepener UCITS ETF, Tabula CDX IG Bond UCITS ETF, Tabula US Enhanced Inflation UCITS ETF, Tabula EUR IG Bond Paris-aligned Climate UCITS ETF, Tabula Haitong Asia ex-Japan High Yield Corp USD Bond ESG UCITS ETF, Tabula Liquid Credit Income UCITS Fund, Tabula USD HY Bond Paris-Aligned Climate UCITS ETF, Tabula EUR HY Bond Paris-Aligned Climate UCITS ETF, Tabula Euro Enhanced Inflation UCITS ETF, Tabula Balanced Credit UCITS Fund, Tabula GCC Sovereign USD Bonds UCITS ETF, Tabula GBP IG Bond Paris-aligned Climate UCITS ETF, Tabula FTSE Indian Government Bond Short Duration UCITS ETF, Tabula Global High Yield Fallen Angels Paris-aligned Climate UCITS ETF, Tabula Global High Yield Credit UCITS Fund, Tabula FTSE Indian Government Bond Short Duration UCITS ETF, Tabula Haitong Asia Pacific Select Bond Fund, Tabula USD Ultrashort IG Bond Paris-Aligned Climate UCITS ETF, Janus Henderson Tabula Japan High Conviction Equity UCITS ETF and Janus Henderson Tabula Pan European High Conviction Equity UCITS ETF (Collectively the "Sub-Funds").

2. Material accounting policies

The financial reporting framework that was applied in the preparation of the full annual financial statements of the ICAV is the applicable law and International Financial Reporting Standards ("IFRS") as adopted for use in the European Union, and applied in accordance with the ICAV Act, the UCITS Regulations and the Central Bank UCITS Regulations.

The unaudited condensed interim financial statements included in the Interim Report have been prepared in accordance with International Accounting Standard 34, 'Interim Financial Reporting' ("IAS 34"), as adopted by the European Union and the UCITS Regulations and the Central Bank UCITS Regulations. The Financial Statements have been prepared on a historical cost basis, except for the non-derivative financial instruments at fair value through profit or loss and derivative financial instruments which have been valued at fair value through profit or loss.

After making all reasonable enquiries and having respect to the nature of the ICAV and its investments, the Directors are satisfied based on information available to them at the present time that it is appropriate to continue to adopt the going concern basis in preparing the unaudited condensed interim financial statements and, after due consideration, the Directors are satisfied that the ICAV has the resources to continue for the foreseeable future. Furthermore, the Directors are not aware of any material uncertainties that may cast significant doubt upon the ability of the ICAV to continue as a going concern.

The comparative figures for the Statements of Comprehensive Income, Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Cash Flows are presented for the period from 1 July 2023 to 31 December 2023. The comparative figures included for the Statement of Financial Position and Interim Schedule of Investments are as at 30 June 2024.

The preparation of unaudited condensed interim financial statements in conformity with IAS 34 requires the use of certain critical accounting estimates. It also requires the Directors to exercise judgement in the process of applying the ICAV's accounting policies.

The accounting policies used in the preparation of these unaudited condensed interim financial statements are consistent and there have been no changes to those used in the ICAV's most recent annual financial statements for the year ended 30 June 2024. The format of these financial statements differs in some respect from that of the most recent annual financial statements, in that the notes to the financial statements are presented in a summary form. The unaudited condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended 30 June 2024.

New standards, amendments and interpretations to existing standards which are effective from 1 January 2024

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on or after 1 January 2024 that have a material effect on the financial statements of the ICAV.

Standards, interpretations and amendments to existing standards in issue but not yet effective

There are a number of new standards, amendments to standards and interpretations issued but not yet effective for annual periods beginning after 1 January 2024 which have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the ICAV.

TABULA ICAV

Notes to the Financial Statements (continued)

for the period from 1 July 2024 to 31 December 2024

3. Fair value measurement

The ICAV classifies fair value measurements using a fair value hierarchy that prioritises the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described below. In determining an instrument's placement within the hierarchy, the directors separate the Sub-Funds' investment portfolios into two categories: investments and derivative instruments.

Level 1	Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Sub-Funds have the ability to access at the measurement date;
Level 2	Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;
Level 3	Inputs that are unobservable.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

However, the determination of what constitutes "observable" requires significant judgement by the directors. The directors consider observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the directors' perceived risk of that instrument.

Transferable securities

Transferable securities whose values are based on quoted market prices in active markets are classified within Level 1. These include active listed equities and treasury bills. The directors do not adjust the quoted price for such instruments, even in situations where the Sub-Funds hold a large position and a sale could reasonably impact the quoted price.

Transferable securities that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2.

Transferable securities classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. There were no Level 3 investments held at the financial period end.

Derivative instruments

Derivative instruments can be exchange-traded, privately negotiated OTC or centrally cleared.

Exchange-traded derivatives, such as contracts for difference, futures contracts and exchange traded option contracts, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded. OTC derivatives such as credit default swaps and forward foreign exchange currency contracts and centrally cleared derivatives such as total return swaps are typically classified within Level 2.

No investments have been classified within Level 3 at any time during the period, consequently no reconciliation of Level 3 fair value measurements is required.

Cash and cash equivalents and bank overdrafts are classified within Level 1 since they have observable inputs in the active market.

The Sub-Funds redeem and issue redeemable Participating Shares at the amount equal to the proportionate share of net assets of the Sub-Funds at the time of subscription or redemption, calculated on a basis consistent with that used in the financial statements.

Accordingly, the carrying amount of Net assets attributable to holders of Participating Shares approximates their fair value. The shares are categorised into Level 2 of the fair value hierarchy.

For the period ended 31 December 2024 and 30 June 2024, all other assets and liabilities, other than investments at fair value, cash and cash equivalents, bank overdrafts and redeemable participating shares, whose carrying amounts approximate fair value would have been considered to be classified within Level 2 of the fair value hierarchy if such classification was required.

Sub-Funds may invest in Financial Derivatives Instruments ("FDI") for investment purposes, for hedging purposes and for efficient portfolio management purposes.

Credit Default Swap Contracts

Credit default swap contracts represent a commitment with a counterparty to provide a level of credit protection in exchange for a commitment to pay interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. The Sub-Funds may enter into credit default swaps in an attempt to simulate long and short bond positions in reference to a single issuer or a basket of issuers. The Sub-Funds use these swaps to reduce risk where the Sub-Funds have exposure to the issuer(s), or to take an active long or short position with respect to the likelihood of default by the underlying issuer(s).

TABULA ICAV

Notes to the Financial Statements (continued)

for the period from 1 July 2024 to 31 December 2024

The buyer of a credit default swap is obligated to pay the seller an upfront payment or a periodic stream of payments over the term of the contract, which typically is between one month and five years, in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

Generally, a credit event means bankruptcy, failure to pay, obligation acceleration or modified restructuring.

The contingent payment may be a cash settlement or a physical delivery of the reference obligation in return for payment of the face amount of the obligation. If the Sub-Fund is a buyer of protection and no credit event occurs, the Sub-Fund records the premium as a reduction in realised gains and losses. However, if a credit event occurs, the buyer typically receives a payment equal to the full notional value for a reference obligation. As a seller, the Sub-Fund receives an upfront payment or a periodic stream of payments throughout the term of the contract, which typically is between one month and five years, provided that no credit event occurs. If a credit event occurs, the Sub-Fund may be required to pay the buyer an amount equal to the full notional value of the reference obligation which may be in excess of the fair value of the credit default swap contract.

Total Return Swap Contracts

A Total Return Swap is a contract between two parties who exchange the return from a financial asset between them. In this agreement, one party makes payments based on a set rate while the other party makes payments based on the total return of an underlying asset.

In a Total Return Swap contract, the party receiving the total return gets any income generated by the financial asset without actually owning it. The payments made by the total return receiver are equal to SOFR +/- an agreed-upon spread. An increase in SOFR during the agreement increases payments due to the payer, while a decrease in SOFR decreases the payments to the payer.

OTC or centrally cleared derivatives, including, credit default swaps, and total return swaps are generally valued by the Investment Manager using observable inputs, such as quotations received from the counterparty, dealers or brokers, whenever available and considered reliable. In instances where models are used, the value of an OTC or centrally cleared derivative depends upon the contractual terms of, and specific risks inherent in, the instrument as well as the availability and reliability of observable inputs.

Such inputs include market prices for reference securities, yield curves, credit curves, and measures of volatility, prepayment rates and correlations of such inputs. Certain OTC derivatives, such as forward foreign exchange currency contracts swaps and options, have inputs which can generally be corroborated by market data and are therefore classified within Level 2.

When the swap contract is exercised, the difference between the premium and the amount paid or received, net of brokerage commissions, or the full amount of the premium if the option expires worthless, is recognised as a gain or loss and is presented in the Statement of Comprehensive Income within net gains/losses on financial assets and liabilities at fair value through profit or loss.

Forward Foreign Exchange Currency Contracts

A Forward Foreign Exchange Currency Contract involves an obligation to purchase or sell a specific currency at a future date, at a price set at the time the contract is made. Forward currency contracts are valued by reference to a forward price at which a new forward contract of the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward exchange contracts is calculated as the difference between the contract rate and the forward price and the relevant Sub-Fund recognises a realised gain or loss when the contract is closed. Unrealised gains or losses are taken to the Statement of Comprehensive Income.

Options

Options are contractual arrangement under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of securities or a financial instrument at a predetermined price. The seller receives a premium from the purchaser in consideration for the assumption of the future securities price.

Notes to the Financial Statements (continued)

for the period from 1 July 2024 to 31 December 2024

4. Financial risk management

There have been no changes to the risk management policies employed by the ICAV to manage its principal financial risks nor have there been any significant changes to the risks to which the ICAV is exposed (market risk (including price risk, currency risk and fair value interest rate risk), credit risk and liquidity risk) since last disclosed in Note 5 to the ICAV's most recent annual financial statements for the year ended 30 June 2024.

5. Fees and expenses

Investment management fees

The ICAV has a fee structure where, in respect of each of the Sub-Funds, all of the fees and expenses (except for broker fees, transaction charges and taxes or duty charges for portfolio re-balancing, all of which are paid separately out of the assets of the respective Sub-Funds) are paid as one single fee. This is referred to as the "Total Expense Ratio" or "TER" in the prospectus of the ICAV and the Supplement of respective Sub-Funds and is being disclosed in this financial statements as "Investment management fee".

The TER is calculated and accrued daily from the Net Asset Value of each Sub-Fund and is payable monthly in arrears to Tabula. Tabula will receive no further disbursement for expenses, out of pocket or otherwise from the Sub-Funds. Except for transaction charges and taxes or duty charges for portfolio re-balancing, all of which are paid separately out of the assets of the Sub-Funds, Tabula will be responsible for the payment of all fees, costs, and expenses of the Sub-Funds, including but not limited to fees and expenses paid to any sub-distributor or paying agent, Haitong International Asset Management (HK) Limited, Janus Henderson Investors UK Limited, the Manager, HSBC Continental Europe (the "Depositary"), HSBC Securities Services (Ireland) DAC (the "Administrator") and Mazars (the "Auditor").

The TER is not expected to exceed the percentages disclosed below. However, if an increase is required it will require prior approval by shareholders of the relevant Sub-Fund, which must be approved by a majority vote at a meeting of shareholders or by written resolution of all shareholders. The Investment Manager has agreed to continue to cover any expenses which exceed the TER for the foreseeable future.

As at 31 December 2024 and 31 December 2023, the following fee percentage was in place for the active share classes on each of the Sub-Funds.

***The Sub-Fund was established on 18 September 2024 and commenced operations on 13 November 2024, and as such, there are no comparatives..

The TER is expressed as a percentage of the Net Asset Value of the Share Classes which represents all legitimate fees and expenses payable by the Sub-Funds (including the Investment Manager's, Manager's, Administrator's, and Depositary's fees) on behalf of the Share Classes. The investment management fee for the financial period ended 31 December 2024 amounted to EUR 2,248,397 (31 December 2023: EUR 1,853,849) of which EUR 410,752 was payable at 31 December 2024 (30 June 2024: EUR 301,040).

Directors' remuneration and expenses

The directors shall be entitled to a fee by way of remuneration for their services at a rate to be determined from time to time by the directors. Each director's remuneration will not exceed EUR 50,000 per annum. The directors are also entitled to be reimbursed by the ICAV for all reasonable disbursements and out-of-pocket expenses incurred by them, if any. However, the reimbursements will not exceed EUR 5,000 per director per annum.

Directors' remuneration and expenses which were paid out of the TER for the financial period ended 31 December 2024 amounted to EUR 13,625 (31 December 2023: EUR 13,625). As at 31 December 2024, no directors' remuneration and expenses were payable (30 June 2024: EUR Nil). Michael John Lytle and Franco Mancini have waived their directors' fees.

Transaction costs

Transaction costs are incremental costs, which are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued, or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value plus or minus, in the case of a financial asset or a financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase of fixed income securities are included on the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Any transaction costs on purchases and sales of credit default swaps are included in net gains/(losses) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income for each Sub-Fund.

5. Fees and expenses (Continued)

Establishment costs

The cost of establishing the ICAV and its Sub-Funds, including the expenses associated with obtaining authorisation from any authority (including, but not limited to, the Central Bank), filing fees, the preparation and printing of the prospectus, marketing costs and the fees and expenses of legal counsel and other professionals involved in the establishment and initial offering of the ICAV, is paid by Tabula.

6. Share capital and redeemable participating shares

The authorised share capital of the ICAV is comprised of subscriber shares to the value of Euro 2 (the "Subscriber Shares") which entitle the shareholders holding them to attend and vote at all meetings of the ICAV, but do not entitle the holders to participate in the dividends or net assets of any Sub-Fund or of the ICAV.

Each of the Shares entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of a Sub-Fund attributable to the relevant Class in respect of which they are issued, save in the case of dividends declared prior to becoming a Shareholder. The Subscriber Shares' entitlement is limited to the amount subscribed and accrued interest thereon.

The movement in the number of redeemable participating shares for the financial period ended 31 December 2024 and 31 December 2023:
